

STANDING BACK-TO-BACK

(see Ecc. 4:9-11 Living Bible)

Couples don't always see eye to eye.
But when they stand back to back,
each one sees a different view.

They may see some of the
same things out of their peripheral vision,
but not clearly.

But when they put their two views together,
they have a complete, 360 degree picture.
And when they look up, they see the same thing!
